

Ladies,

Tuesday, 12/14/2021, was an interesting day: a bit of weather during play threatened to reduce an already diminished field, and some of the directions were confusing to several. For instance, T9, Longest Putt. which was intended to be the longest first and only putt of a player that resulted in the ball being holed out. So if a player chipped onto the green, landed 6" from the pin and successfully putted it in, that could be the longest putt. In contrast, if a player putted from the front of the green to within a foot of the pin, even though the putt may have been 40', because it didn't go into the cup, it could not be considered the longest putt. In a similar manner, Closest to the Pin (T2, C3, & C6) is A DRIVE from the TEE BOX which lands closest to the pin. In retrospect, while there may have been moments of confusion, it was a great day and a great learning experience. Next time we will add a simple instruction sheet to accompany the scorecard. Thanks for coming out to play!
